About The Project

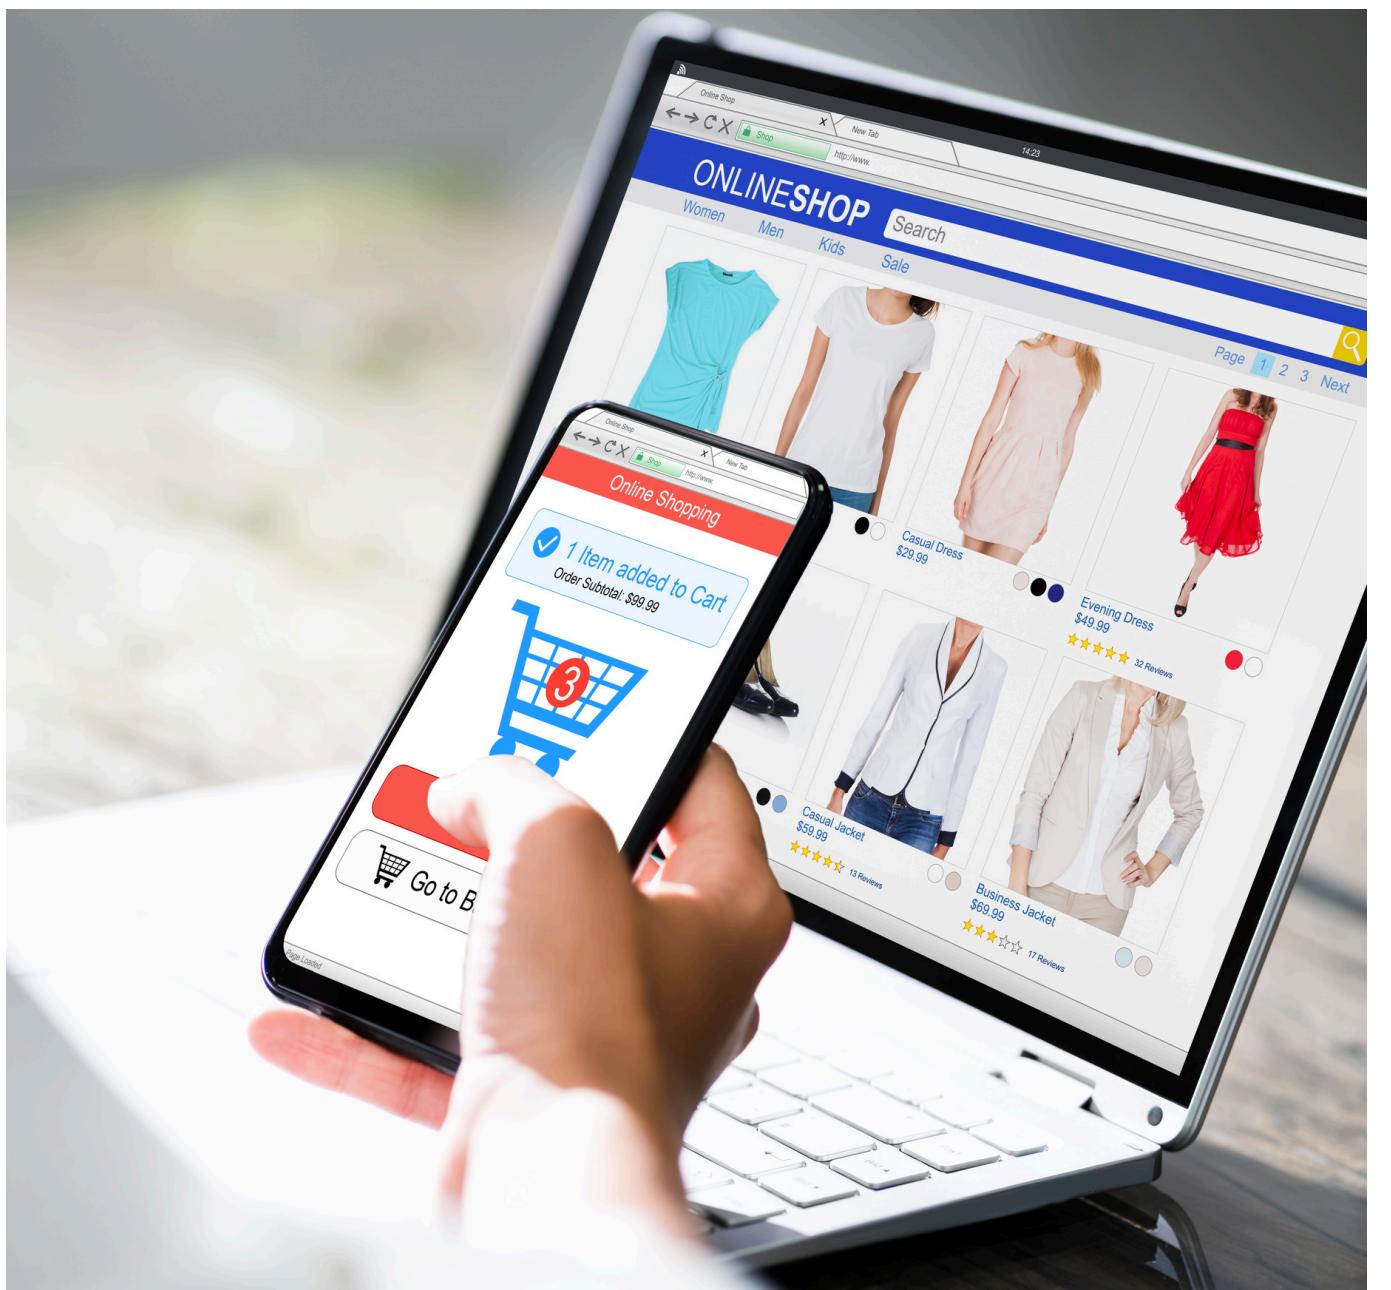

We Bring Your Ideas To Life

Ulasan adalah sumber feedback vital di industri e-commerce untuk memahami kepuasan pelanggan dan performa produk.

Tantangan Utama: Volume data ulasan sangat besar dan tidak terstruktur, sehingga analisis manual tidak efisien.

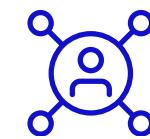

The Ideas

Menggunakan **Natural Language Processing (NLP)** untuk otomatisasi analisis dan mendapatkan insight seperti memprioritaskan perbaikan fitur produk.

Tujuan Proyek

Our Goals

Pertama

Bagaimana distribusi sentimen (positif, negatif, netral) dari ulasan pelanggan secara keseluruhan?

Kedua

Apa saja topik utama yang paling sering dibicarakan pelanggan dalam ulasan mereka?

Ketiga

Bagaimana distribusi sentimen untuk setiap topik? (Contoh: Apakah sentimen untuk topik "baterai" positif, sementara untuk "pengiriman" negatif?)

Dataset

ECInstruct

ECInstruct dibagi menjadi training sets dan validation sets.

Sumber:

SA only

116,528
30,000

output	input	options	task	split
string	string	string	string	string
E: very negative	Clock time would not set. Returned and received replacement. New one was able to set time initially. After short time the...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
B: positive	This is a very good mp3 player. I found it very workable, and the sound quality is great. It's just as good as a cd, or maybe...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	Another Benchmade, another love story. GREAT PRICE on Amazon, I got a really good deal!	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
B: positive	This molding is paintable, holds well and easy to install. I ran it on my wall and ceiling to hide our wiring and it looks...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	The XF times adapter is well made as I've compared with other similar adapters, this one was one of the best I came across,...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	Since this type of exercise is coming back in style, I was glad I was able to find one easily on line.	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
B: positive	I use the USB reader to transfer photos from my Olympus D-400 Zoom digital camera to my iMac. Before buying my iMac, I had...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	Works great, haven't had any issues with this tray and have cooked with out about 5 times.	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
E: very negative	The bean and coffee holder would stick in the coffeemaker from the beginning and I had to use a knife to get it out. Finally ...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
B: positive	I use this item with P90x and I get a great workout with it. I'm pretty fit and this seems to be just right. I do wonder if...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	Bounce capability of the 420ex is worth the money over the 220ex. I use this with a Canon G5 and while the 420ex seems to...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	I was a bit skeptical about this product before I bought it. Having used it a couple of times I would say I made a very goo...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	GREAT! best price you can find on these. don't pay 15-20\$ for one sock. .	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	A little pricey for what they do and how basic they are, but they have a reputable name behind them, which in this case...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train
A: very positive	Great product! Adjustable waist, reinforced knees, nice color and style!	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train

Descriptive statistics of the DataFrame:

	output	input	options	task	split	consolidated_output	
count	30000	30000	28000	30000	30000	30000	
unique	5	12999	1	1	3	3	
top	A: very positive	Ditch your drip and percolated coffee makers. ...	["A: very positive", "B: positive", "C: neutral", "D: negative", "E: very negative"]	Sentiment_Analysis	train	Positive	
freq	18426	4	28000	30000	20000	23614	

Value counts for 'output' column:

	count
output	
A: very positive	18426
B: positive	5188
E: very negative	2700
C: neutral	2276
D: negative	1410

	count
consolidated_output	
Positive	23614
Negative	4110
Neutral	2276

dtype: int64

Value counts for 'task' column:

	count
task	
Sentiment_Analysis	30000

dtype: int64

Value counts for 'split' column:

	count
split	
train	20000
test	8000
val	2000

dtype: int64

Menggabungkan dari 5 label menjadi 3 label:

- “Very Positive” & “Positive” --> Positive.
- “Very” negative” & “Negative” --> Negative.
- “Neutral” == Neutral.

Tools & Libraries For The Project

Bahasa Pemrograman: Python

Library Utama:

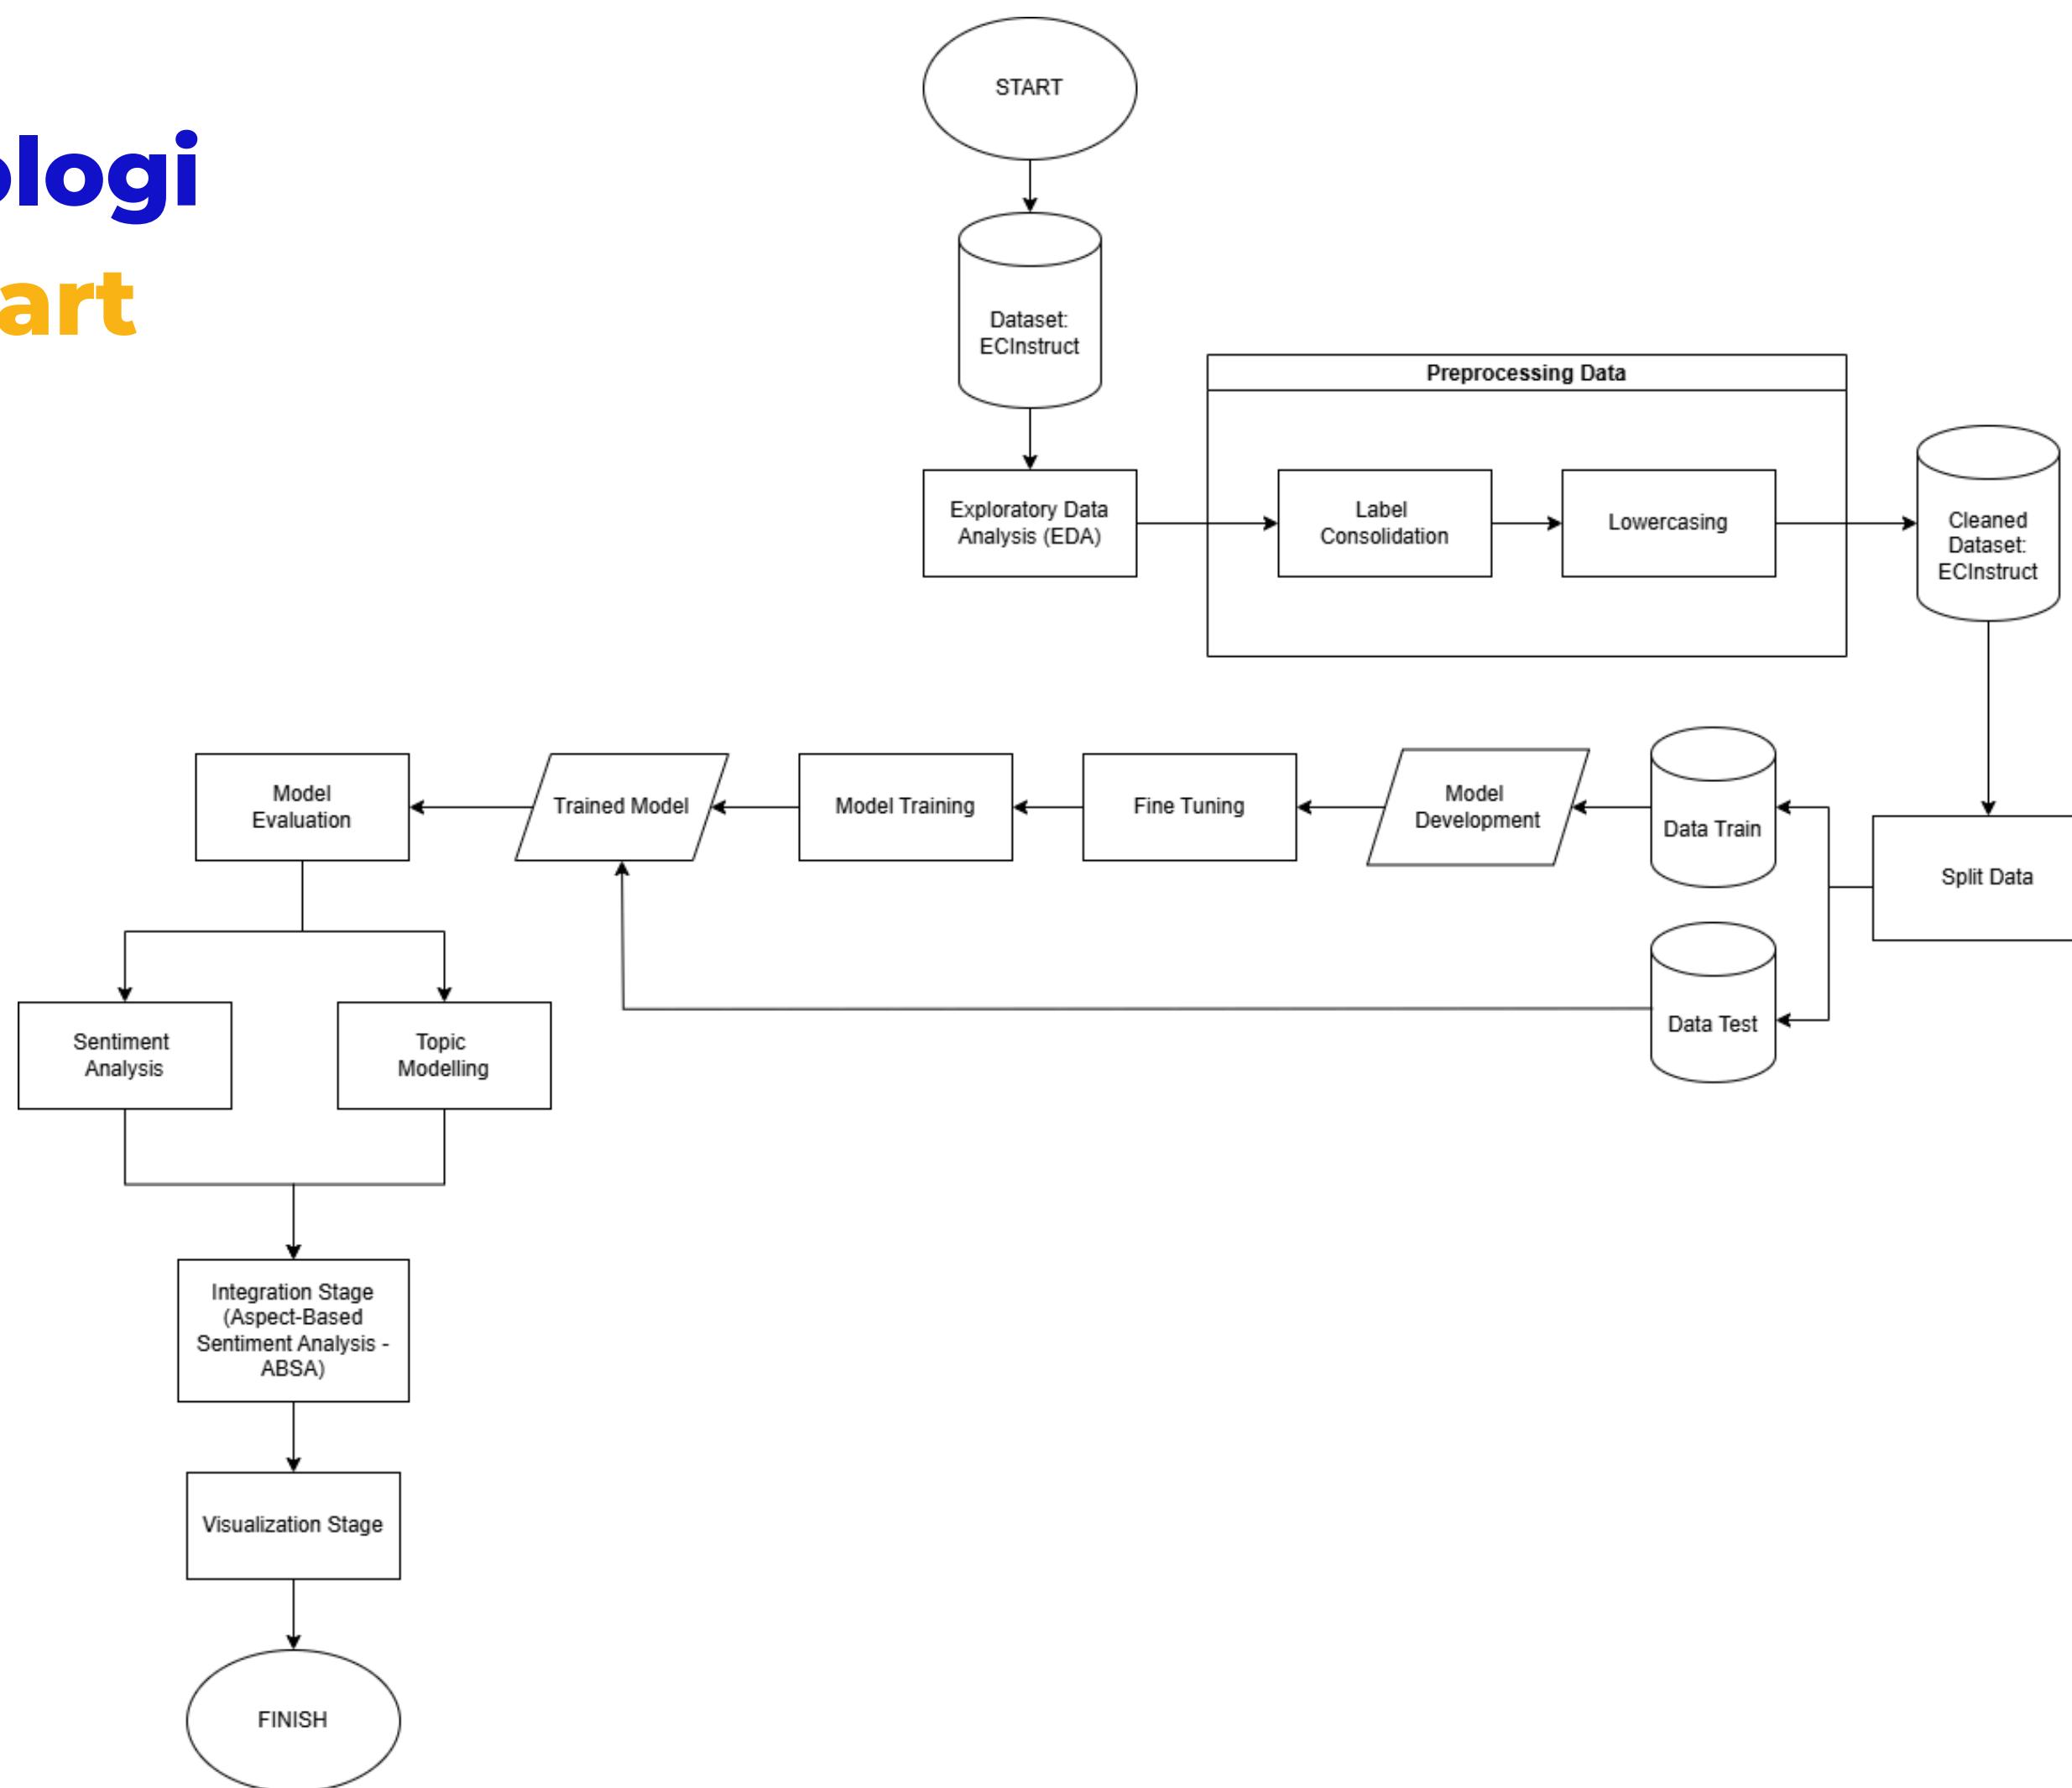

- Hugging Face Transformers
- BerTopic
- Pandas & Scikit-learn
- Matplotlib & Seaborn

```
animLength = toTime - fromTime
# prompt user for directory
filePath = c4d.storage.SaveDialog()
filePath, objName = os.path.split(filePath)
objName = objName + "_"
filePath = filePath + "\\"
# Check for confirmation
questionDialogText = "Obj Sequence will be saved as:\n\n" \
    "" + filePath + objName + "##.obj\n\n" \
    "from frame " + str(fromTime) + " to " + str(toTime) + " for " + str(animLength) + " frames.\n"
proceedBool = c4d.gui.QuestionDialog(questionDialogText)

if proceedBool == True:
    # Loop through animation and export frames
    for x in range(0,animLength):
        # change frame, redraw view
        moveTime = c4d.BaseTime(fromTime,docFps) + c4d.BaseTime(x,docFps)
        doc.SetTime(moveTime)
        c4d.EventAdd(c4d.EVENT_FORCEREDRAW)
        c4d.DrawViews(c4d.DRAWFLAGS_FORCEFULLREDRAW)

        # progress bar
        c4d.StatusSetText("Exporting " + str(x) + " of " + str(animLength))
        c4d.StatusSetBar(100.0*x/animLength)
        # add buffer 0001
```

Metodologi Flowchart

Metodologi

Gambaran Umum

Exploratory Data Analysis (EDA)

Proses awal untuk memahami karakteristik, pola, dan hubungan dalam dataset.

Pemodelan Topik

Menggunakan BerTopic untuk mengidentifikasi topik-topik utama.

Pra-pemrosesan Data

Membersihkan dan menyiapkan data ulasan.

Analisis Sentimen Berbasis Aspek (ABSA)

Menggabungkan hasil sentimen dan topik.

Analisis Sentimen

Melatih model Transformer (seperti BERT) untuk mengklasifikasikan sentimen.

Visualisasi & Interpretasi

- Visualisasi hasil sentimen dan topik.
- Analisis Sentimen Berbasis Aspek (ABSA)

Metodologi

Detail Teknis

Sumber Data

Dataset ECInstruct, diambil 30.000 (SA task) dari 116.528 sampel data untuk tugas NLP analisis sentiment e-commerce.

Pra-pemrosesan

- Menyederhanakan 5 label sentimen menjadi 3 (Positif, Netral, Negatif).
- Hanya lowercasing, karena stopwords dan tanda baca sangat penting untuk konteks model Transformer (Alzahrani et. al.)

Model yang Digunakan

- Analisis Sentimen: Model Transformer (BERT).
- Pemodelan Topik: Library BerTopic.

Metrik Evaluasi

Akurasi, Presisi, Recall, dan F1-Score untuk mengukur performa model

[1] E. Alzahrani and L. Jololian, "How Different Text-Preprocessing Techniques using the Bert Model Affect the Gender Profiling of Authors," Academy and Industry Research Collaboration Center (AIRCC), Sep. 2021, pp. 01–08. doi: 10.5121/csit.2021.111501.

Hasil yang Diharapkan

Output Research

Laporan Distribusi Sentimen

Grafik yang menunjukkan
persentase ulasan di setiap label.

Analisis Sentimen Berbasis Aspek (ABSA)

Melakukan pemetaan sentimen
untuk setiap aspek topic produk.

Daftar Topik Utama

Identifikasi 5-10 topik teratas
beserta kata kuncinya.

About The
Analysis

Conclusions

The Project

Proyek ini menunjukkan bagaimana NLP dengan model berbasis transformer dapat mengubah ulasan pelanggan menjadi aset strategis yang lebih akurat bagi bisnis e-commerce untuk meningkatkan performa penjualan.

TERIMA KASIH
